This listing of the claims will replace all prior versions and listings of claims in the application:

Listing of the claims:

Claim 1: (original) An adhesive patch having a pressure-sensitive adhesive layer comprising bisoprolol and/or a pharmaceutically acceptable salt thereof, wherein the composition of pressure-sensitive adhesive layer contains an acrylic polymer obtained by copolymerizing a (meth)acrylic ester with a (meth)acrylic acid comprising a carboxyl group.

Claim 2: (currently amended) The adhesive patch according to claim 1, wherein the acrylic polymer contains ~~substantially~~ no alcoholic hydroxyl group in molecules.

Claim 3: (previously presented) The adhesive patch according to claim 1, wherein the (meth)acrylic ester constituting the acrylic polymer is 2-ethylhexyl acrylate.

Claim 4: (previously presented) The adhesive patch according to claim 1, wherein the acrylic polymer is a 2-ethylhexyl acrylate·vinyl acetate·acrylic acid copolymer.

Attorney Docket No.: **KUZ0028US.NP**
Inventors: **Tateishi et al.**
Serial No.: **10/566,350**
Filing Date: **January 27, 2006**
Page 3

Claim 5: (previously presented) The adhesive patch according to claim 1, wherein the composition of the pressure-sensitive adhesive layer contains further an elastmeric polymer.

Claim 6: (original) The adhesive patch according to claim 5, wherein the elastmeric polymer is at least one kind selected from a group consisting of styrene-isoprene-styrene block copolymer, polyisobutylene, isoprene rubber, styrene-butadine-styrene block copolymer, styrene-butadine rubber and silicone rubber.

Claim 7: (previously presented) The adhesive patch according to claim 1, wherein the percutaneous absorption promoter is at least one kind selected from a group consisting of lauryl alcohol, myristyl alcohol, oleyl alcohol, isostearyl alcohol, diethyl sebacate, lauric diethanolamide, isopropyl myristate, glycerol monocaprates, glycerol monolaurate, glycerol monooleate, sorbitan monolaurate, propylene glycol monolaurate, polyoxyethylene lauryl ether, pyrothiodecane, an organic acid and a pharmaceutically acceptable salt thereof.

Attorney Docket No.: **KUZ0028US.NP**
Inventors: **Tateishi et al.**
Serial No.: **10/566,350**
Filing Date: **January 27, 2006**
Page 4

Claim 8: (original) The adhesive patch according to claim 7, wherein the organic acid and/or the pharmaceutically acceptable salt thereof are at least one kind selected from a group consisting of acetic acid, propionic acid, lactic acid, salicylic acid and pharmaceutically acceptable salts thereof.

Claim 9: (original) The adhesive patch according to claim 7, wherein the percutaneous absorption promoter is isopropyl myristate.

Claim 10 (canceled)

Claim 11: (previously presented) The adhesive patch according to claim 1, wherein the drug is bisoprolol hemifumarate.

Claim 12: (previously presented) The adhesive patch according to claim 1, wherein the penetration rate of bisoprolol through the skin is 3-300 $\mu\text{g}/\text{h}\cdot\text{cm}^2$.

Attorney Docket No.: **KUZ0028US.NP**
Inventors: **Tateishi et al.**
Serial No.: **10/566,350**
Filing Date: **January 27, 2006**

Claim 13: (new) The adhesive patch according to claim 2, wherein acrylic polymer further contains copolymerized butyl acrylate.

Claim 14: (new) The adhesive patch according to claim 13, wherein the acrylic polymer is a 2-ethylhexyl acrylate·butyl acrylate·acrylic acid copolymer.

Claim 15: (new) The adhesive patch according to claim 7, wherein the (meth)acrylic ester constituting the acrylic polymer is 2-ethylhexyl acrylate.

Claim 16: (new) The adhesive patch according to claim 12, wherein the penetration rate of bisoprolol through the skin is 4.0-300 $\mu\text{g}/\text{h}\cdot\text{cm}^2$.

Claim 17: (new) The adhesive patch according to claim 1, wherein the (meth)acrylic ester constituting the acrylic polymer is butyl acrylate.

Claim 18: (new) The adhesive patch according to claim 2, wherein acrylic polymer further contains copolymerized vinyl acetate.
